

PRESS RELEASE

VIA optronics acquired by IMI to expand Technology and Product Portfolio

August 18, 2016, Altdorf, Germany — Integrated Micro-Electronics Inc. (PH: IMI) and the shareholders of VIA optronics GmbH (VIA) announced the signing of a definitive agreement under which IMI will acquire a 76 percent stake in VIA, a leading optical bonding and display solutions provider, for EUR 47.4 million. Company founder Jürgen Eichner will retain a 24 percent ownership and continue to lead VIA as managing Director, reporting to Arthur R. Tan, IMI's chief executive officer. The acquisition is expected to be accretive to IMI's earnings per share starting 2017. The transaction, which will be financed through debt, is expected to close in the third quarter of 2016.

Alpina Partners is selling all of its 55% shareholding as part of the transaction. Alpina Partners has been a shareholder in the company since June 2010.

Optical bonding is a technology that significantly enhances the visibility and performance of display systems, especially for outdoor use. The technology also enhances the display's quality, throughput and efficiency of the display system integration process. VIA's bonding material and intellectual property on its optical bonding processes, enable high bonding yields, for multiple display applications. For consumer applications, the technology enables thinner and lightweight designs, while also offering the flexibility to accommodate curved, plastic and large size applications, putting VIA in a strong position to address the growing demand for automotive and industrial display applications. IMI's existing offerings in the automotive, industrial and medical markets also matches VIA's experience in high reliability and ruggedized markets.

"We announce today an exciting next chapter for VIA, as we have found the perfect strategic partner that is aligned with our values and growth ambitions," Eichner said. "Once combined, we will have the scale to introduce our patented technology into camera monitor systems, ruggedized display solutions and reliable display applications. IMI has a great cultural fit with our organization and I am excited for our employees to benefit from the long-term prospects of being part of IMI."

"This transaction represents a unique opportunity to accelerate IMI's growth and broaden VIA's opportunities by leveraging off of IMI's global footprint and resources," Tan said. Together, IMI and VIA will be best positioned to revolutionize the way the world experiences vision and touch on displays. We believe the acquisition will allow IMI to strengthen its partnerships with customers by offering complementary automotive camera and display monitor solutions for advanced driver assistance systems. We look forward to further developing and utilizing the synergies between the two companies."

About VIA

VIA is a leading company in sunlight readable interactive display solutions including touch screens. Starting with industrial and high reliability products, the company has conquered all market segments as a leading provider for optical bonding a key technology to lower reflections thus enabling sunlight readability and

increase robustness, which is mandatory to allow thinner and lighter portable display solutions. VIA has developed proprietary material for optical bonding and holds valuable intellectual property for bonding processes and equipment resulting in very high production yields. VIA was established in 2005 and has approximately 290 employees across four countries. Together with its headquarters in Altdorf, Germany, VIA has research facilities and manufacturing sites in Mörsdorf, Germany and Suzhou, China, and sales offices in Florida and Taipei. About IMI

Integrated Micro-Electronics Inc. (IMI) is one of the leading global providers of electronics manufacturing services (EMS) and power semiconductor assembly and test services with manufacturing facilities in Asia, Europe, and North America. It serves diversified markets that include those in the automotive, industrial, medical, telecommunications infrastructure, storage device, and consumer electronics industries. Committed to cost-effective and innovative customized solutions (from design and product development to manufacturing and order fulfillment), the company's comprehensive capabilities and global manufacturing presence allow it to take on specific outsourcing needs. A subsidiary of Ayala Corporation, IMI ranks 18th on the latest list of Manufacturing Market Insider for the top 50 EMS providers in the world based on the 2014 EMS-related revenues of companies.
